SCHOOL OF ALLIED HEALTH PROFESSIONS
15TH & RACE STREET
PHILADELPHIA, PENNSYLVANIA

Forget about the days
when it's been cloudy,
but don't forget
your hours in the sun . . .

Forget about the times
you've been defeated,
but don't forget
the victories you've won . . .

Forget about mistakes
that you can't change now,
but don't forget
the lessons that you've learned . . .

Forget about misfortunes
you've encountered,
but don't forget
the time your luck has turned . . .

Forget about the days
when you've been lonely,
but don't forget
the friendly smiles you've seen . . .

Forget about the plans
that didn't seem to work out right,
but don't forget to
always have a dream.

The production of the 1988 Horizons Yearbook has been a tremendous project that required a large commitment of our time. There are problems you encounter that can't be anticipated. Like shooting a roll of film that wasn't loaded properly or finding out you have 16 more pages on a deadline than you expected and working all night to finish it. But we had fun doing it.

This year commemorates the tenth production of the SAHP yearbook. Never has it benefitted from a better staff or more experienced faculty. Without the cooperation of various and numerous individuals, this task would have been a difficult one. Without the dedicated yearbook staff who orchestrated this project regardless of prior commitments or impending examinations, this task would have been an impossible one.

The encouragement and support we received from Dr. Haroian helped us survive the endless meetings. When we wanted to quit, Steve Anderson pointed out the bright side, and the satisfaction the yearbook has to offer. Jean Dorman saved us from nasty photographers and was always available for one more favor. Phil Klein from Jostens was the mastermind behind the magic.

I'd also like to thank you for being brave enough to trust us with irreplaceable memories. We hope you like the purple cover. The time we've served at Hahnemann deserves only the best.

Hahnemann's Future Planned

Hahnemann is once morally bankrupt, financially destitute, and has become an institution that is old and growing. It is continuing and well into the twenty-first century. This year a remodeled Stiles Hall is its first satellite, strengthened its ties with the Crozer-Keightley Medical Center, established the University's third campus. It is the growth that will strengthen the University. Hahnemann's future, however, will not be a dream. Hahnemann is in the process of developing its University Plan. The

DISTINGUISHED FACULTY AWARD

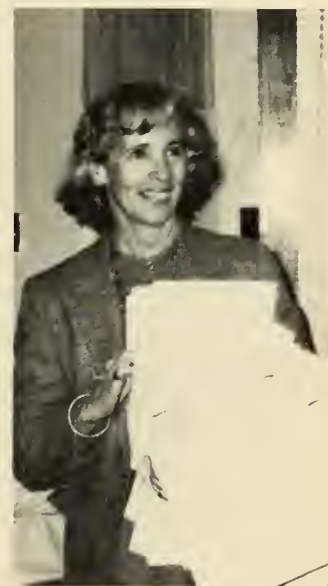

Jane Burger, MSN

Jane Burger, MSN, Program Director, Associate Degree Nursing Program, Dept. of Nursing Education, received the Distinguished Faculty Award at the June, 1987 Commencement Ceremonies. This award is given for excellence in teaching and outstanding service to the School of Allied Health Professions.

Mrs. Burger graduated from the University of Dayton in 1955 with a Bachelors Degree in Nursing. She earned a Master of Science degree in Nursing at Wayne State University in 1960. She previously taught nursing for six years in Detroit and nine years at Montgomery Hospital School of Nursing prior to coming to Hahnemann University. She became Program Director of ADN in 1980. She

received the Outstanding Achievement Award in Nursing from Hahnemann in 1984 and the Outstanding District Nurse Award in 1984 from the Pennsylvania Nurse Association. She has been Chairman and a member of the Admissions Committee of SAHP. Mrs. Burger is also a member of the Academic Standing Committee and the committee to prepare for Middle States Accreditation. She has served as co-chairman of the Planning and Development Committee and has been inducted into Alpha Eta Honorary Society.

The student and the yearbook staff wish to congratulate Mrs. Burger on her outstanding achievement.

NEW BEGINNINGS

Horizons

In hidden harbors, a distant sound
Calls shoremen to set sail for azure seas.

With eager minds and able bodies, boats are
readied;
Hoisted anchors let docked boats drift free.

Charting each new point challenges
Sights that past experience will oversee.

From secure inlets, captains carefully
Navigate channels opening seaward gradually.

Soon Celestial bodies bend to Neptune's realm,
welcoming sailors
With an arc that glistens like honey pouring into
tea.

When brimy vessels brought into the wind
Join horizon's line with their lee,

Some voyagers find safe horizon's port
And further venturing flee.

But others sail on, their bolder spirits
undaunted
By wakes in the mysterious sea;

For those brave boatmen—faithfully trusting
their call—
Seek ports of farther horizons with vigorous
energy.

So, like these beckoned shoremen
Journeying nobly out to sea;

We must set sail for divergent ports
To claim our horizons wherever they may be.

NEW BEGINNINGS

Health Sciences and Society is a program that offers a curriculum which integrates the natural sciences with the social sciences, and those two disciplines with the humanities and the arts. The curriculum is designed to ensure that the student will be exposed to different career paths within the vast and changing health care industry.

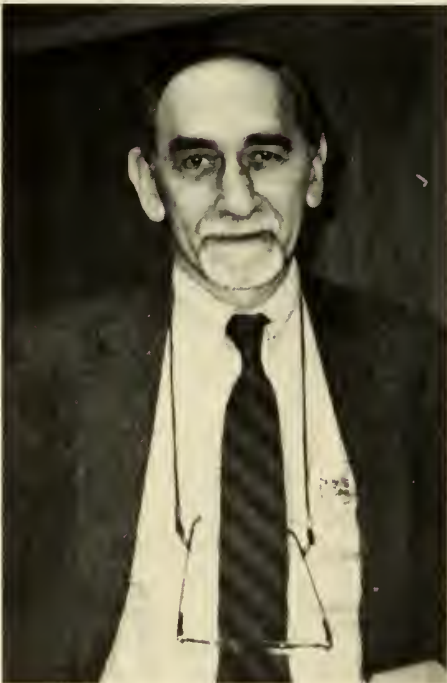

The Department of Humanities and Social Sciences offers a two-year course of study leading to an Associate Degree in Arts or an Associate Degree in Science. The program offers students the opportunity to develop and enhance communication skills in writing and speaking as well as to broaden their background in a variety of disciplines including literature, history, political science, philosophy, fine arts, anthropology and linguistics.

The Department of Biometrics and Computing offers courses to all schools of Hahnemann University and serves a major function as a research component in the University. The Department operates a biomedical computing center with hardware and software to perform statistical analysis, computer simulations, graphical models, and mathematical modeling. The Department offers undergraduate courses in mathematics, statistics, physics, and computer science, required for students enrolled in certain SAHP programs.

MENTAL HEALTH TECHNOLOGY

The mental health technologist is prepared to perform a diversity of tasks within service delivery in the mental health field. The technologist carries responsibilities in a degree commensurate with his/her middle level professional education, involving direct patient care and contact with the families of patients.

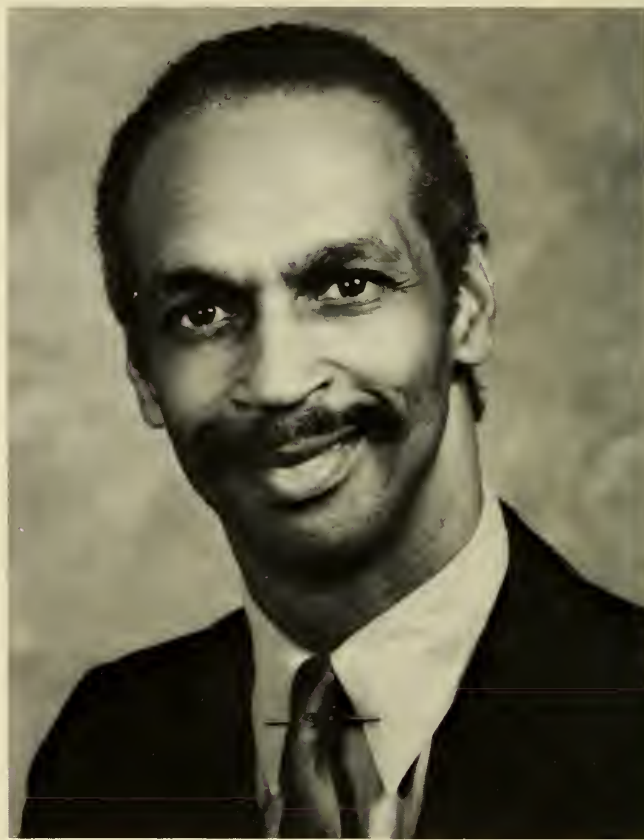

The Associate Degree Program in Mental Health Technology prepares students to meet the demanding need for qualified mental health and human services workers. These workers function as part of a team of other human services professionals (the psychiatrist, psychologist, social workers, psychiatric nurse etc.) in mental health and human services agencies.

The Bachelor of Science Program is an upper division program preparing students for mid-level positions in the mental health delivery program. Hahnemann students acquire the knowledge and skills necessary for the effective practice of psychosocial treatment related to community mental health, psychiatric rehabilitation and resocialization.

Baccalaureate Degree Program

PHYSICIAN ASSISTANT

Physician assistants are primary health care providers who work under the supervision of a physician as vital members of the health care team.

The concept of the physician assistant is relatively new and has developed from the basic premise that many tasks performed by physicians can be carried out with equal competence by specially trained health professionals. Hahnemann graduates are trained to perform complete or directed history and physical exams, organize the results, evaluate tests, diagnose, or present cases in a problem-oriented fashion to the supervising physician. They are also trained to carry out the therapeutic plan and counsel patients about signs and symptoms, the meaning of the diagnosis, the rationale for the effects of treatment, the prognosis, and necessary follow-up.

A physician assistant delivers patient care in a wide variety of practice settings under the supervision of a licensed physician who is responsible and legally liable for the performance of the assistant.

NURSING . . .

The Associate Degree Nursing Program is a two year accelerated program combining liberal arts, science and nursing courses that include clinical rotations. At the end of two successfully completed years, the graduate is prepared to take the State Board of Examination leading to licensing as a registered nurse. The program prepares a skilled patient-side nurse who can function on the health care team in a hospital and in the community. The Hahnemann graduate will have an in-depth grasp of concepts underlying basic health problems. The nursing process is used to plan care for patients at various stages of the life cycle when there are disruptions of health, crisis situations, and alterations in life style.

The Bachelor of Science Nursing program gives RNs who have either an associate degree or a nursing diploma the opportunity to obtain a Bachelor of Science degree. The program is built upon the knowledge base in nursing already acquired by students in their first-step programs. The focus is upon enlarging and deepening the cognitive skills of the nursing process, no repetition of foundational knowledge occurs.

RADIOLOGY TECHNOLOGY

Radiography is the art and science of imaging the tissues, organs, bones and vessels that comprise the human body, by means of radiation.

The radiographer, at the direction of a physician, applies his/her knowledge of anatomy, physiology, positioning and radiographic techniques to accurately demonstrate anatomical structures on a radiograph or other imaging receptor. A thorough understanding of the principles of radiation protection, radiation biology, and the physics of radiation is necessary to produce quality diagnostic images while minimizing radiation exposure to the patient. Radiographers work in a variety of settings, such as hospitals, clinics, private offices, industrial and experimental laboratories and commercial sales.

THE LOGICAL SONG

When I was young, it seemed that life was so wonderful, a miracle, oh it was beautiful, magical.

And all the birds in the trees, well they'd be singing so happily, joyfully, playfully watching me.

But then they sent me away to teach me how to be sensible, logical, responsible, practical.

And they showed me a world where I could be so dependable, clinical, intellectual, cynical.

There are times when all the world's asleep,
the questions run too deep
for such a simple man.

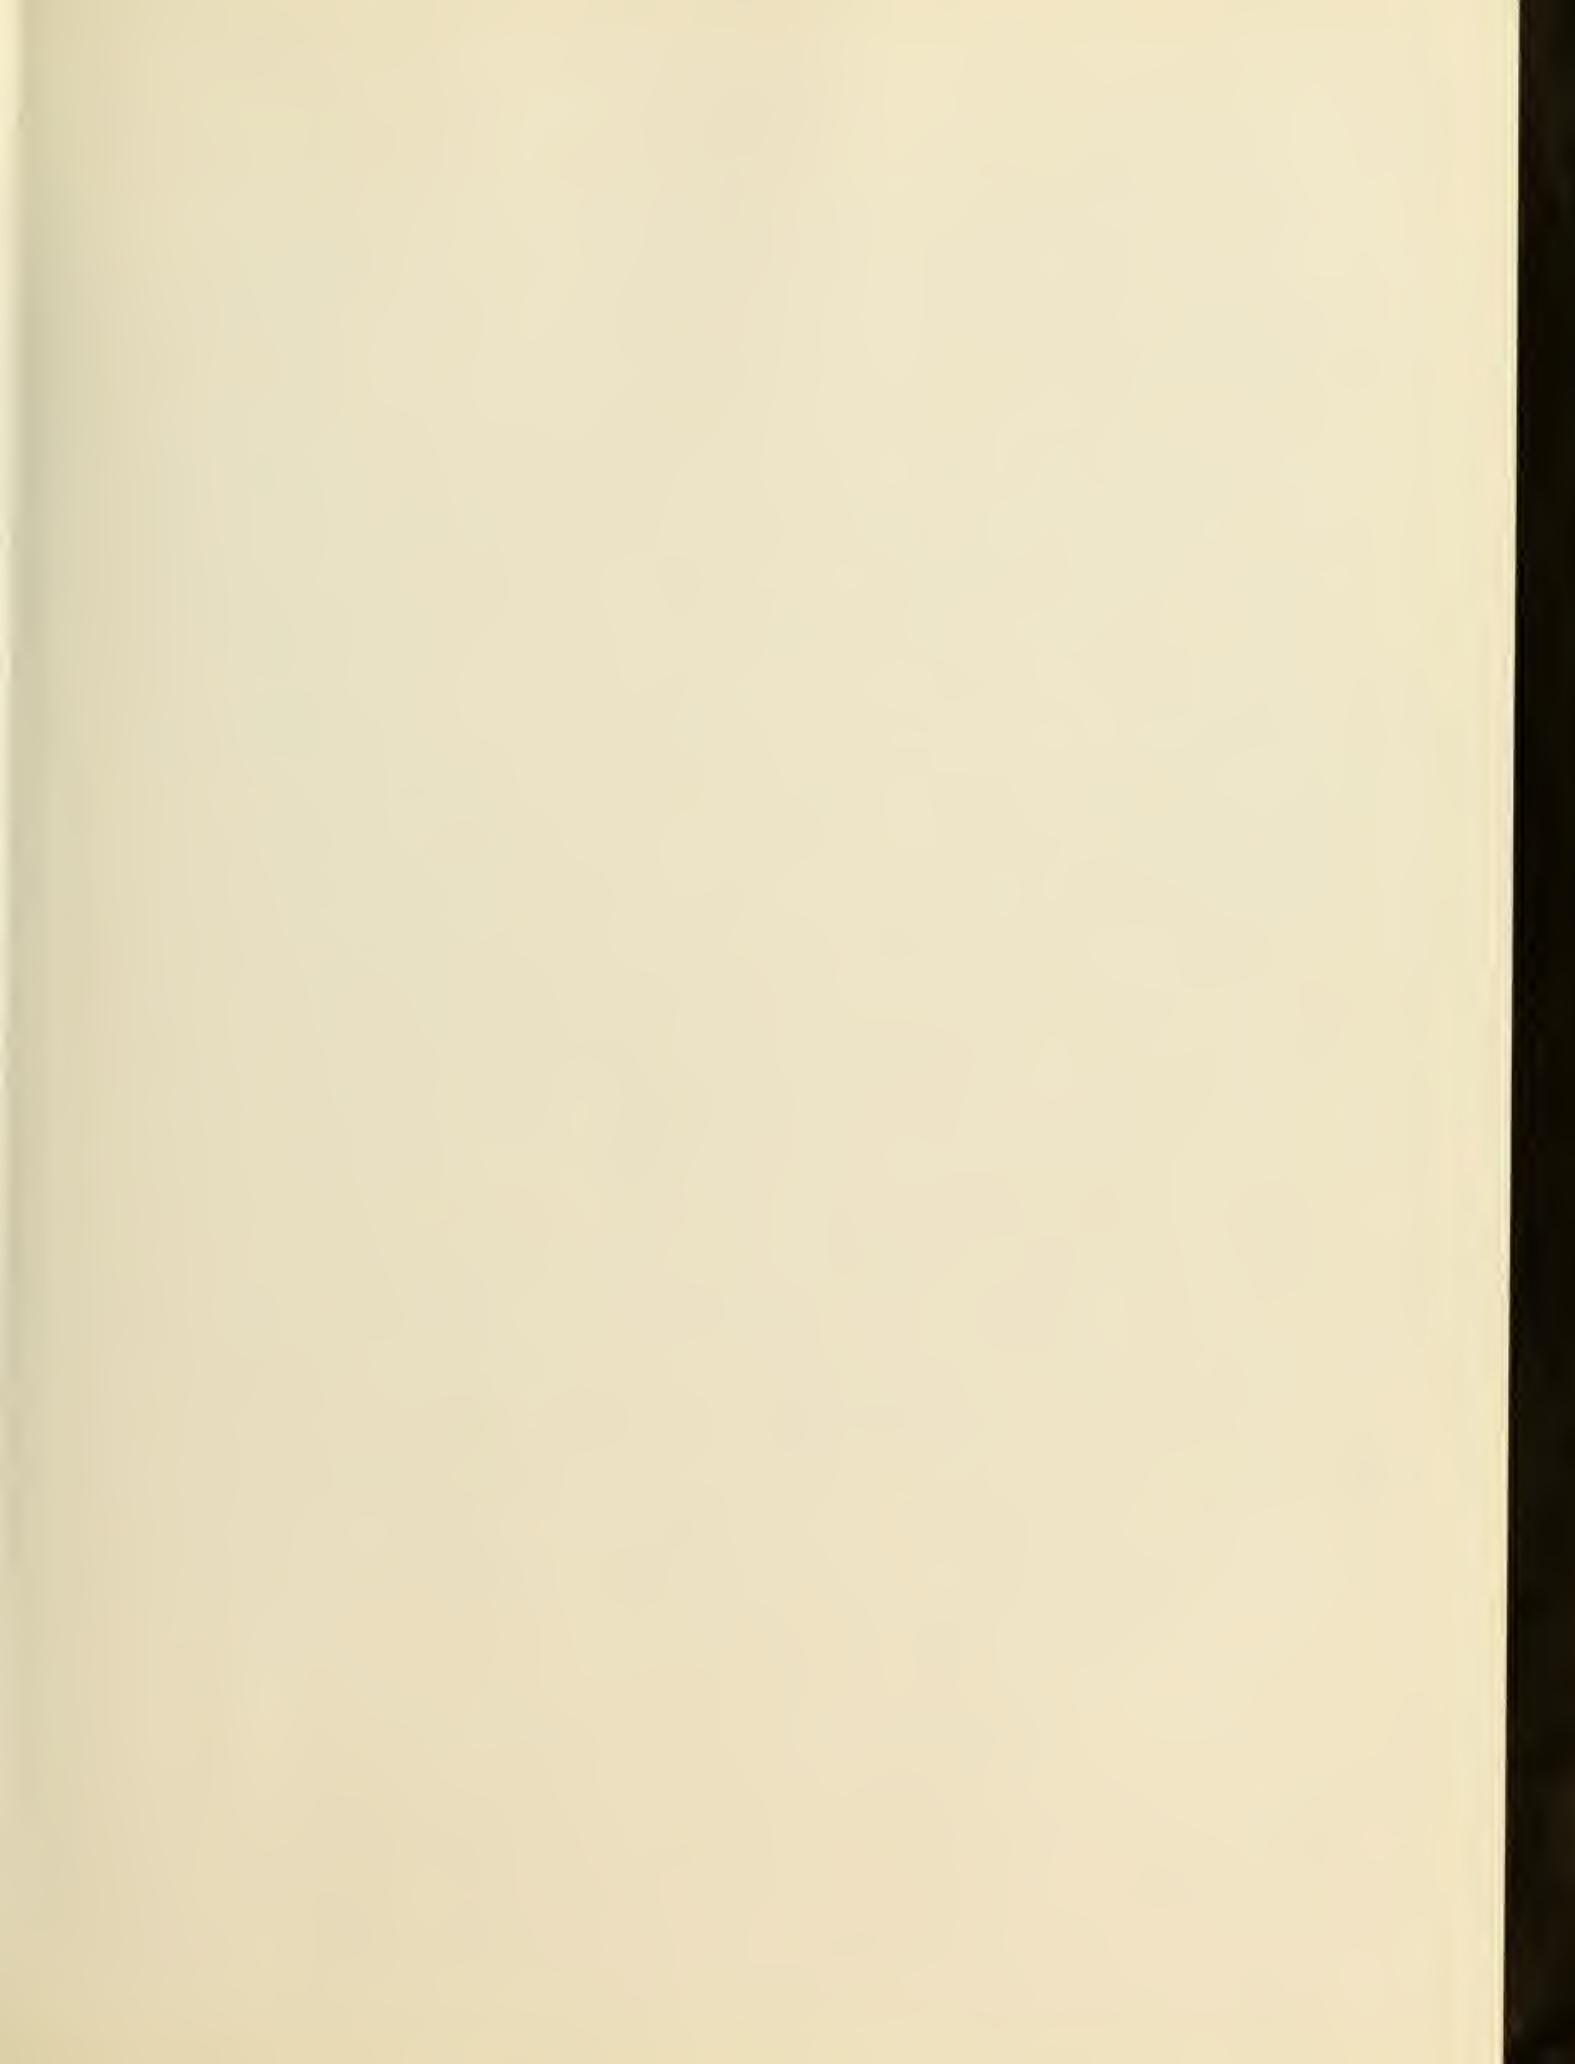

Won't you please, please tell me what we've learned
I know it sounds absurd
but please tell me who I am.

Now watch what you say or they'll be calling you a radical, liberal, fanatical, criminal.

Won't you sign up your name, we'd like to feel you're acceptable, respectable, presentable, a vegetable!

At night, when all the world's asleep,
the questions run so deep
for such a simple man.

Won't you please, please tell me what we've learned
I know it sounds absurd
but please tell me who I am.
